Lars Ahlfors's Lectures on Quasiconformal Mappings, based on a course he gave at Harvard University in the spring term of 1964, was first published in 1966 and was soon recognized as the classic it was shortly destined to become. These lectures develop the theory of quasiconformal mappings from scratch, give a self-contained treatment of the Beltrami equation, and cover the basic properties of Teichmüller spaces, including the Bers embedding and the Teichmüller curve. It is remarkable how Ahlfors goes straight to the heart of the matter, presenting major results with a minimum set of prerequisites. Many graduate students and other mathematicians have learned the foundations of the theories of quasiconformal mappings and Teichmüller spaces from these lecture notes. This edition includes three new chapters. The first, written by Earle and Kra, describes further developments in the theory of Teichmüller spaces and provides many references to the vast literature on Teichmüller spaces and quasiconformal mappings. The second, by Shishikura, describes how quasiconformal mappings have revitalized the subject of complex dynamics. The third, by Hubbard, illustrates the role of these mappings in Thurston's theory of hyperbolic structures on 3-manifolds. Together, these three new chapters exhibit the continuing vitality and importance of the theory of quasiconformal mappings.

Lectures on Quasiconformal Mappings

Why do young Saudis, night after night, joyride and skid cars on Riyadh's avenues? Who are these 'drifters' who defy public order and private property? What drives their revolt? Based on four years of fieldwork in Riyadh, Pascal Menoret's Joyriding in Riyadh explores the social fabric of the city and connects it to Saudi Arabia's recent history. Car drifting emerged after Riyadh was planned, and oil became the main driver of the economy. For young rural migrants, it was a way to reclaim alienating and threatening urban spaces. For the Saudi state, it jeopardized its most basic operations: managing public spaces and enforcing law and order. A police crackdown soon targeted car drifting, feeding a nation-wide moral panic led by religious activists who framed youth culture as a public issue. This book retracts the politicization of Riyadh youth and shows that, far from being a marginal event, car drifting is embedded in the country's social violence and economic inequality.
The disruptive power of montage has often been regarded as a threat to scholarly representations of the social world. This volume asserts the opposite: that the destabilization of commonsense perception is the very precondition for transcending social and cultural categories. The contributors—anthropologists, filmmakers, photographers, and curators—explore the use of montage as a heuristic tool for comparative analysis in anthropological writing, film, and exhibition making. Exploring phenomena such as human perception, memory, visuality, ritual, time, and globalization, they apply montage to restructure our basic understanding of social reality. Furthermore, as George E. Marcus suggests in the afterword, the power of montage that this volume exposes lies in its ability to open the very “combustion chamber” of social theory by juxtaposing one’s claims to knowledge with the path undertaken to arrive at those claims.

This project-oriented facilities design and material handling reference explores the techniques and procedures for developing an efficient facility layout, and introduces some of the state-of-the-art tools involved, such as computer simulation. A “how-to,” systematic, and methodical approach leads readers through the collection, analysis and development of information to produce a quality functional plant layout. Lean manufacturing, work cells and group technology, time standards, the concepts behind calculating machine and personnel requirements, balancing assembly lines, and leveling workloads in manufacturing cells; automatic identification and data collection; and ergonomics. For facilities planners, plant layout, and industrial engineer professionals who are involved in facilities planning and design.

The Constitution of Matter

A luminous sequel to the highly acclaimed first volume of Theatres of Memory, Island Stories is an engrossing journey of discovery into the multiple meanings of national myths, their anchorage in daily life and their common sense of a people’s destiny. Raphael Samuel reveals the palimpsest of British national histories, offering a searching yet affectionate account of the heroes and villains, legends and foibles, cherished by the “four nations” that inhabit the British Isles. Samuel is interested by the fact that traditions can disappear no less abruptly than they were invented. How is it, he asks, that the Scots have lost interest in a British narrative of which they were once a central protagonist? Why is the celebration of “Britons” thriving today just as its object has become problematic? Island Stories marvelously conveys the mutability of national conceits. Samuel calls witness a galaxy of authorities—Bede and Gerald of Barri, Macaulay and Stubbs, Shakespeare and Dickens, Lord Reith and Raymond Williams, Margaret Thatcher and Tony Benn—each of whom sought to renew the sense of national identity by means of an acute sense of the past. Island Stories is a luminous study of the way nations use their past to lend meaning to the present and future. This sequel to the widely acclaimed Theatres of Memory is as passionate, unexpected and enjoyable as its predecessor.

Behaviour management in the classroom and schoolyard is one of the most challenging aspects of teaching. Student Behaviour offers a comprehensive overview of the major theories of behaviour management in primary and secondary schools, illustrated with detailed case studies. Porter outlines how teachers can develop a personal approach to classroom management based on a sound understanding of theory. The emphasis is on proactive approaches to discipline to assist students in achieving educational and social goals. Porter also shows how to enhance students' motivation and help students become confident and independent learners. This third edition has been fully revised and updated to reflect the latest research, and includes new material on collaborating with parents, ethical issues, dealing with bullying and helping students to be autonomous in their learning and behaviour. Examples and references are drawn from current international research. Student Behaviour is an essential textbook for preservice teachers and a valuable reference for more experienced teachers who want to improve their ability to cope with disruptive behaviour. The style of writing is clear, accessible and authoritative an ideal text for all teachers in initial and post-experience training. It treats its audience as intelligent and discerning, provides a clear digest of a very wide range of published material, and allows its readers to reach their own decisions about suitable and sensitively executed approaches that are likely to be of lasting value. - British Journal of Educational Psychology

The Social Scientific Study of Exorcism in Christianity

A very dirty book about a very unusual relationship.

The Usefulness of the Useless
This book presents an academic analysis of exorcism in Christianity. It not only explores the crisis and drama of a single individual in a fight against demonic possession but also looks at the broader implications for the society in which the possessed lives. In recognition of this, coverage includes case studies from various geographical areas in Europe, North and South America, and Oceania. The contributors explore the growing significance of the rite of exorcism, both in its more structured format within traditional Christian religions as well as in the less controlled and structured forms in the rites of deliverance within Neopentecostal movements. They examine theories on the interaction between religion, magic, and science to present new and groundbreaking data on exorcism. The fight against demonic possession underlines the way in which changes within the religious field, such as the rediscovery of typical practices of popular religiosity, challenge the expectations of the theory of secularization. This book argues that if possession is a threat to the individual and to the equilibrium of the social order, the ritual of exorcism is able to re-establish a balance and an order through the power of the exorcist. This does not happen in a social vacuum but in a consumer culture where religious groups market themselves against other faiths. This book appeals to researchers in the field.

DISCIPLE IV UNDER THE TREE OF LIFE is the final study in the four-phase DISCIPLE program and is prepared for those who have completed BECOMING DISCIPLES THROUGH BIBLE STUDY. The study concentrates on the Writings (Old Testament books not in the Torah or the Prophets), the Gospel of John, and Revelation. Emphasis on the Psalms as Israel’s hymnbook and prayer book leads natural to an emphasis on
worship in the study. Present through the entire study is the sense of living toward completion - toward the climax of the message and the promise, extravagantly pictured in Revelation. The image of the tree and the color gold emphasize the prod and promise in the Scriptures for DISCIPLE IV: UNDER THE TREE OF LIFE. The word under in the title is meant to convey invitation, welcome, sheltering, security, and rest - home at last. Commitment and Time Involved 32 week study Three and one-half to four hours of independent study each week (40 minutes daily for leaders and 30 minutes daily for group members) in preparation for weekly group meetings. Attendance at weekly 2.5 hour meetings. DVD Set Four of the five videos in this set contain video segments of approximately ten minutes each that serve as the starting point for discussion in weekly study sessions. The fifth video is the unique component that guides an interactive worship experience of the book of Revelation. Under the Tree of Life Scriptures lend themselves to videos with spoken word, art, dance, music, and drama. Set decoration differs from segment to segment depending on the related Scripture and its time period. Set decoration for video segments related to the Writings generally has a Persian theme. Set decoration for the New Testament video segments emphasizes the simpler life of New Testament times.

**Orientalism and War**

Orientalism is a system of truths that imagines the world can be meaningfully understood in terms of a distinction between "West" and "East" from the Greek and Persian Wars onwards. It is also about an institutionalised community of experts who represent with authority this world of East and West, as for example in media and policy discussions of the Islamic sources of terrorism. The papers in this volume, which include chapters by Bruce Cumings, Susan Jeffords, and John Mowitt among others, explore three dimensions of the relations between Orientalism and war. The first concerns the representations of "Self" and "Other" that mark the participation of Orientalism in war and which, for example, suffuse media coverage of the War on Terror. Second are the ways in which war is productive of Orientalisms. It is in and through violent conflict that various Western and Eastern identities are defined and come to be taken for granted. The third is about the inverse relation: how Orientalisms amount to acts of war. By redefining politics and identities in such a way as to require a West that brings order to an unstable, violent East, Orientalism is productive of war. Patrick Porter closes the volume in an afterword about the themes explored in these papers and questions for further reflection.

**Ottoman Centuries**

In an age of skepticism and disenchantment, people long for something that satisfies our mind's search for truth and our heart's desire for beauty and meaning. Stand Firm: Apologetics and the Brilliance of the Gospel argues that the gospel satisfies both of these needs. It is true and rational, but it is also inherently attractive and provides meaning and purpose. In short, the gospel is brilliant. It is brilliant, in one sense, because of the broad variety of evidences for its truth. But it is also brilliant given its beauty, goodness and the meaningful life it offers. The book provides up to date responses to questions about the existence of God, the reliability of the Bible, Jesus and the resurrection, and the problem of evil. It also treats unique topics such as understanding truth, knowledge and faith, the claims of alternate faiths, religious disagreement, etc. Each chapter attempts to connect these considerations with the gospel so that we may stand firm in our faith.

“‘A little masterpiece of originality and clarity.’ —George Steiner ‘‘A necessary book.’’ —Roberto Saviano ‘‘A wonderful little book that will delight you.’’ —François Busnel International Best Seller / Now in English for the First Time In this thought-provoking and extremely timely work, Nuccio Ordine convincingly argues for the utility of useless knowledge and against the contemporary fixation on utilitarianism—for the fundamental importance of the liberal arts and against the damage caused by their neglect. Inspired by the reflections of great philosophers and writers (e.g., Plato, Dante, Montaigne, Shakespeare, Borges, and Calvino), Ordine reveals how the obsession for material goods and the cult of utility ultimately wither the spirit, jeopardizing not only schools and universities, art, and creativity, but also our most fundamental values—human dignity, love, and truth. Also included is Abraham Flexner’s 1939 essay “The Usefulness of Useless Knowledge,” which originally prompted Ordine to write this book. Flexner—a founder and the first director of the Institute for Advanced Study in Princeton—offers an impassioned defense of curiosity-driven research and learning.

**The Cambridge History of Medieval Monasticism in the Latin West**

Monasticism, in all of its variations, was a feature of almost every landscape in the medieval West. So ubiquitous were religious women and men throughout the Middle Ages that all medievalists encounter monasticism in their intellectual worlds. While there is enormous interest in medieval monasticism among Anglophone scholars, language is often a barrier to accessing some of the most important and groundbreaking research emerging from Europe. The Cambridge History of Medieval Monasticism in the Latin West offers a comprehensive treatment of medieval monasticism, from Late Antiquity to the end of the Middle Ages. The essays, specially commissioned for this volume and written by an international team of scholars, with contributors from Australia, Belgium, Canada, England, France, Germany, Italy, the Netherlands, Spain, Switzerland, and the
United States, cover a range of topics and themes and represent the most up-to-date discoveries on this topic.

Saudi Arabia is a major piece on the world geopolitical chessboard. Despite the suspicion that has enveloped the country since September 11, 2001, Saudi Arabia remains the key US ally in the Arab Middle East, a role secured by its continuing position as the world's largest oil exporter and its ever-growing influence in the Muslim world. Yet the country is still very poorly understood. Western observers have rarely been able to penetrate this closed society and its opaque political system. Cliché's about the role of oil wealth and fundamentalist Wahhabi Islam often serve to further mask the reality. The true complexity of Saudi society cannot be reduced to a mixture of poorly assimilated modernity and medieval Bedouin tradition. This volume illustrates the emerging autonomous - and Islamic - manifestations of Saudi national identity, fiercely reformist rather than medieval, complex and varied rather than merely a justification or support for the rule of the al-Saud royal family. Underlying Menoret's account is a sophisticated economic history of the Saudi state, from the eighteenth century to the present day, which details all the alliances and manoeuvres that have brought the country and its rulers to their current precarious position.

PREFACE. THE Author of this very practical treatise on Scotch Loch - Fishing desires clearly that it may be of use to all who had it. He does not pretend to have written anything new, but to have attempted to put what he has to say in as readable a form as possible. Everything in the way of the history and habits of fish has been studiously avoided, and technicalities have been used as sparingly as possible. The writing of this book has afforded him pleasure in his leisure moments, and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general. This section is interleaved with blank sheets for the reader's notes. The Author need hardly say that any suggestions addressed to the case of the publishers, will meet with consideration in a future edition. We do not pretend to write or enlarge upon a new subject. Much has been said and written - and well said and written too - on the art of fishing but loch-fishing has been rather looked upon as a second-rate performance, and to dispel this idea is one of the objects for which this present treatise has been written. Far be it from us to say anything against fishing, lawfully practised in any form, but many pent up in our large towns will bear us out when we say that, on the whole, a day's loch-fishing is the most convenient. One great matter is, that the loch-fisher is dependent on nothing but enough wind to curl the water, and on a large loch it is very seldom that a dead calm prevails all day, and can make his arrangements for a day, weeks beforehand whereas the stream-fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river, it is quite another matter to arrange for a day's river-fishing, if one is looking forward to a holiday at a date some weeks ahead. Providence may favour the expectant angler with a good day, and the water in order but experience has taught most of us that the good days are in the minority, and that, as is the case with our rapid running streams, such as many of our northern streams are, the water is either too large or too small, unless, as previously remarked, you live near at hand, and can catch it at its best. A common belief in regard to loch-fishing is, that the tyro and the experienced angler have nearly the same chance in fishing, the one from the stem and the other from the bow of the same boat. Of all the absurd beliefs as to loch-fishing, this is one of the most absurd. Try it. Give the tyro either end of the boat he likes give him a cast of ally flies he may fancy, or even a cast similar to those which a crack may be using and if he catches one for every three the other has, he may consider himself very lucky. Of course there are lochs where the fish are not abundant, and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught, and where each has a fair chance. Again, it is said that the boatman has as much to do with catching trout in a loch as the angler. Well, we don't deny that. In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream-fishing.

**Breaking the Academic Lock Step**

The Ottoman Empire began in 1300 under the almost legendary Osman I, reached its apogee in the sixteenth century under Suleiman the Magnificent, whose forces threatened the gates of Vienna, and gradually diminished thereafter until Mehmed VI was sent into exile by Mustafa Kemal (Ataturk). In this definitive history of the Ottoman Empire, Lord Kinross, painstaking historian and superb writer, never loses sight of the larger issues, economic, political, and social. At the same time he delineates his characters with obvious zest, displaying them in all their extravagance, audacity and, sometimes, ruthlessness.
